Our core offering is a big data analytics and AI based software product, which brings together and correlates real time information across applications, business transactions and infrastructure. Our customers choose VuNet to improve their customer experience in the new digital world.

VuNet Systems is headquartered in Bangalore, India and is expanding globally. Founded in 2014, by a group of innovators, VuNet Systems has solid funding from top tier firms.

Job Description

Owner of the quality of the product.

Roles and Responsibilities

- Primary responsibility to work with a small team of engineers to test various features of the analytics platform in delivering a best in class solution to customers
- Involved in designing, developing and automating test plans for scenarios including scalability, benchmarking, and performance
- Work closely with Prospects on trials to ensure best-in-class trial experience and help converting Prospects to Customers
- Work with internal teams to develop compelling content, use cases and scenarios that make a product shine through a trial experience

Skills and Experience

- 5+ years of QA experience in networking and/or security domains
- Experience with working on systems like Splunk, HP ArcSight, IBM QRadar, Elastic Search
- Hands-on knowledge on network equipment configuration of different devices like Cisco/Juniper routers/firewalls.

- Experience working across multiple domains of server, network and application stacks
- Experience with Jenkins, Selenium, Load testing tool capability
- Good background in performance engineering test methodologies
- Experience in Linux/Python, Shell Scripting or any other scripting language
- Excellent communication skills, both verbal and written
- Knowledge/Experience in the following technologies will be an added plus:
 - Elastic search, MongoDB, Big Data, SQL databases, ELK stack, REST APIs, web services, JMX)
- A self-starter, who loves to take on hard problems, enjoys breaking things and working in startup environments.

What We Offer ?

Along with a competitive salary, we offer a generous employee stock option plan and a fun work atmosphere, with other talented, motivated and interesting co-workers. You will also be working on cutting edge technologies, where you take ownership of end to end development. You will get ample opportunities to learn and grow your abilities and be part of a very enriching journey.

How to Apply ?

If you are interested, e-mail us at jobs@vunetsystems.com, with your resume and an explanation of why you would be a good fit. But what we would also like to see is some code you have written. We look forward to hearing from you.
